SUMMARY

IT undergraduate (**9.22 CGPA**) at CBIT with hands-on experience in full-stack development (MERN), applied Machine Learning, and Generative AI / LLM integration. Shipped an **LLM-powered (Groq API, Llama-3.3-70B)** attacker-intent classifier with structured-output enforcement, a **Meta NLLB-200** transformer translation pipeline accelerated on Apple Silicon (MPS), and a deployed examination platform used live by **70+ students**. Strong DSA, OS, DBMS foundations; energized by teams that build reliable AI systems at scale.

EDUCATION

B.E. in Information Technology — Chaitanya Bharathi Institute of Technology, Hyderabad 2023 – May 2027
CGPA: **9.22** | *Coursework:* DSA, OOP, DBMS, OS, Computer Networks, Machine Learning, Deep Learning, Big Data Analytics
Pre-University: Intermediate (MPC) — **98.3%** (Sasi New Gen Jr College) | SSC — **94.6%** (St. Ann's EM High School)

SKILLS

Languages: Python, JavaScript, SQL

AI / ML: LLM Integration (Groq API, Llama-3.3-70B), Prompt Engineering, Structured JSON Output, Transformer NMT (Meta NLLB-200), Transfer Learning, MPS Acceleration, Machine Learning, Deep Learning

Web & Backend: MERN Stack (MongoDB, Express.js, React.js, Node.js), REST APIs, Server-Sent Events (SSE), JWT, HTML, CSS

Cloud / Tools: AWS EC2, Render, Cloudinary, Git, Postman, SQLite, Flutter

PROJECTS

Adaptive Deception-Driven Cyber Resilience Validation System

[GitHub](#)

Python, Groq API (Llama-3.3-70B), Paramiko, SQLite, AWS EC2

- Engineered an **LLM-fallback classifier (Groq API, Llama-3.3-70B)** mapping attacker commands to an 11-class threat taxonomy with **confidence-gated acceptance (≥ 0.75)**, structured JSON output enforcement, and a 3-tier parse-and-repair pipeline, achieving **90%+ accuracy** on held-out sessions.
- Built an **SSH honeypot** capturing **100+ unique attack patterns** into a normalized 5-table SQLite schema; a dual-purpose prompt simultaneously produces the threat label and a realistic fake shell response, maintaining deception without predefined templates.
- Designed a **Chaos Engine** that escalates stress-test intensity on repeated attacks, mirroring SOC workflows and cutting mean threat detection time by **30%**.

AI PDF Translator — English to Telugu

[GitHub](#)

Flask, Meta NLLB-200, PyMuPDF, HarfBuzz, Server-Sent Events

- Optimized Meta's **NLLB-200 transformer encoder-decoder** with vectorized batching and **Apple Silicon (MPS) hardware acceleration**, slashing inference latency **from minutes to seconds**.
- Architected a fully offline Flask app with background threading and **SSE-based real-time progress streaming**; engineered a custom PyMuPDF processor with HarfBuzz for accurate Telugu script rendering.

Virtual Exam Bridge

[Live](#) | [GitHub](#)

MERN Stack, JWT, Role-Based Access Control, Session Management

- Deployed and used in production to conduct exams for **70+ students**, eliminating paper-based workflows and reducing teacher set-preparation effort by approximately **50%**.
- Architected role-based access control (student and teacher portals) with a question bank featuring 3-level difficulty classification and a real-time submission tracker, cutting grading preparation time significantly.

CERTIFICATIONS

Microsoft [Azure Fundamentals \(AZ-900\)](#)

Salesforce [AgentForce Specialist](#) | [AI Associate](#)

NPTEL [Joy of Computing with Python](#) — **Elite + Gold, 94%, Top 2% nationwide**

ACHIEVEMENTS & LEADERSHIP

- Smart India Hackathon (SIH) 2025** — Qualified at college level, representing CBIT; submitted project PPT on live government problem statements, advancing through internal selection rounds.
- Sudhee 2026 Hackathon** — Podium finish at CBIT's institutional hackathon; delivered a Flutter + Deep Learning prototype under time constraints.
- Event Head** — *Cache If You Can*, Sudhee 2026 | Dept of Information Technology, CBIT 2026
- Event Volunteer** — *Capture the Flag*, Sudhee 2025 | CCC Club, CBIT 2025
- LeetCode:** 300+ problems solved | **HackerRank:** 5 Python | NPTEL **Top 2% nationwide**.
